Social Media: CMT is currently active on Facebook, Twitter, Instagram, LinkedIn and YouTube. By connecting with us on social media you'll receive pertinent industry news and exclusive online discounts for many of the products we carry. Simply search Current Medical Technologies, Inc. on any of the social media platforms and start saving.

CMT Newsletter: Are you receiving Spotlight? CMT releases a monthly newsletter that can benefit you, your facility and your patients. Like our social media pages, the CMT newsletter offers industry news, Q&A's, as well as a PT Spotlight. To join simply go to cmtmedical.com and sign up for the Spotlight.

Are You Blogging? Let us help you reach more followers. CMT now has a blog section available on our website. If you are interested in reaching a greater audience and would like to post your blogs to the CMT website, please contact us and we will get you set up!

Shipping Policy

CMT offers two shipping carriers services; UPS and USPS for all orders. Orders placed by Physicians, Physical Therapists or their facilities are shipped via UPS Ground; unless otherwise directed by them. Orders placed by customers/patients are shipped via USPS Priority Mail, unless otherwise directed by them. CMT is not responsible for any lost or damaged items once it leaves our warehouse. Customers with lost or damaged items will have to seek resolution with the carrier service company they chose.

Orders placed before 2:00 pm ET are usually shipped the same day unless the product is back-ordered. Orders placed after 2:00 pm ET are usually shipped the next business day unless the product is back-ordered. Orders placed after 2:00 pm ET on Friday are shipped the following Monday unless product is back-ordered or falls on a holiday. CMT will notify customers via email with respect to anticipated shipping date for all back-ordered products.

UPS delivery times vary depending on your location, with the average delivery time of 2-6 days. Our shipping warehouse is based in Massachusetts; therefore, orders going to the Northeast US can expect delivery from 1-3 days, while orders going to the West coast can expect delivery time ranging from 4-6 days. Please note, UPS does not consider the day of pick up as the first day of shipping. Customers should take this into consideration when choosing any type of expedited shipping.

UPS does not deliver on Saturdays and Sundays. Customers should take this into consideration when choosing Next Day Air or 2nd Day Air Shipping. Also, UPS does not deliver on major U.S. holidays. It is the responsibility of the customer to check the UPS website for a list of observed UPS Holidays. Customers should also take this into consideration when choosing Next Day Air or 2nd Day Air Shipping. Also, CMT will not be responsible for late deliveries during any holiday or weather-related period when service is interrupted.

USPS Priority Mail delivery times vary depending on your location and the day of order and does not come with a guarantee of service. Once USPS declares your package delivered, and it has not been received, you will need to contact your local postal office to determine where they delivered it to.

CMT Products

V-Tone Vaginal Weights:

V-Tone vaginal weights is a set of weights that are inserted into the vagina to help strengthen the pelvic floor muscles. These muscles extend from the pubic bone to the tail bone and support the bladder and uterus. The set includes two cones (one

small and one large to be individually used based on anatomical introitus size) that are used to house the weight and make for a comfortable weightlifting experience. The set includes two 20gm weights, one 10gm weight and one 5gm weight. This allows the user to start with 5 grams and progress, in 5gm increments to as much as 55 grams.

CMT Order #	CMT-MC200	Price	\$34.95 ea

Serenity- R

Serenity- V

Serenity Therapy Massage Tool:

The Serenity-TMT is designed to reach internal musculature within the pelvic floor region. The curvature of the tool, combined with its overall dimension and tapered end, make it ideal for reaching muscles that are close to the surface as well as deeper musculature. Once identified, the tool can be used to stretch pelvic muscles and release trigger points which may potentially decrease or eliminate symptoms related to bladder, bowel and sexual dysfunction while relieving pain or pressure in the pelvic girdle, tailbone or genital regions.

Serenity Cleaning Instructions:

Caution: Do not put the Serenity into the dishwasher for cleaning. Do not use any ammonia, alcohol or anti-bacterial based products to clean the Serenity! Doing so will damage the product and void warranty. No Exceptions.

- Remove tool from the plastic bag
- Rinse using hot water from the sink/tap
- You may use either 7th Generation Plant Based Free and Clear Dish Liquid or generic Hydrogen Peroxide (Both have been tested to clean the tool)
- Apply 7th Generation Free and Clear to your hands and then apply soapy suds to the tool and thoroughly clean; or Apply Hydrogen Peroxide to a towel or paper towel and then thoroughly clean the tool
- Rinse in hot water and repeat
- Let the tool air dry on a dry towel or paper towel
- Once dried, place back in velvet bag
- Repeat process starting with Step 2 when using the tool again

The Serenity pelvic floor massage tool is designed for single patient multi-use application.

Release :

Genetics, pregnancy, delivery, heavy lifting, poor breathing and/or chronic straining can lead to structural and anatomical changes in a woman's pelvic structures; such as Rectocele or pelvic floor drop. These changes can lead to weakened and compromised support for the pelvic organs (vagina, uterus, rectum and/or bladder). These conditions are often referred to as pelvic organ prolapse or pelvic relaxation. The benefits of using the Release is to support the pelvic tissues so that the bowels can fully evacuate without straining, and to protect vulnerable tissues from further stress. Release enhances your quality of life by providing ease of bowel movement with less discomfort and better efficiency.

- ▶ The Release helps to create a more anatomical positioning so the bowels can be emptied with ease.
- ▶ Silicone wrapped for soft, comfortable ease of use
- ▶ Elongated handle to accommodate all body types including pregnancy
- ▶ Single Patient / Multi-use tool
- ▶ Cleans with mild, anti-bacterial soap and warm water.
- ▶ Use with water-based lubricant only

Extended Size Vaginal Dilators: Vaginal dilators are used to restore vaginal capacity, to expand the vagina in width and depth, to provide elasticity to the tissues, and to allow for comfortable sexual activity. An Extra Large Vaginal Dilator is for those individuals that need additional width for their vaginal dilation therapy.

CMT Order #	Description	Price
SM-9S	Complete Set. Set of all 8 Syracuse vaginal dilators and CMT's 43 mm Dilator. Not Available	\$96.25 ea
CMT-VD-43	Large Plus + (43 mm Dia / 135mm Circumference)	\$15.95 ea

POP-QMs: A simple measuring stick that allows the Clinician to determine the amount of hiatal ballooning in patients with an increased risk of Pelvic Organ Prolapse. The POP-QMs is graduated to 12.5cm in .5 cm increments that give the Clinician the ability to accurately determine the severity of ballooning. POP-QMs comes in a packs of 50 sticks (50/Pkg.).

CMT Order #	Description	Price
CMT-PQMs	POP-Qms 12 cm graduated measuring stick for accurate POP-Q evaluations.	\$17.95 pkg

CMT-RLW-71: Single patient, multi use sEMG lead-wire set. Low cost option. Works with most manufacturers instrumentation with the use of PG-7100 for MR & TR series. ** Replaces the CMP-W21010 wires **

MR-20 Clinical Packages

This package will provide the Clinician with two hand held units: MR-20 and STM-10 . The MR-20 has two channels of sEMG to monitor the pelvic floor and one accessory muscle. The STM-10 offers one channel of pelvic floor stimulation (PFS.) The MR-20 is our most popular MR-Series unit, however other units in the MR-Series may be purchased. Please call to go over all options. **Please note that the images seen here are representational images only, as all packages are customized to fit individual needs and budget.**

CMT Order #	CP-M20

Starter Accessory Package:

- (1)- Telesis Software
- (1)- Pelvic Floor Stim (PG-STM-10)
- (1)- High-Speed USB 2.0 Cable, A to B 6ft. (PCC-412121)
- (1)- Pathway Velcro Adapter (PG-3660)
- (1)- Adapter for reusable & Disposable Lead wire electrodes (PG-7100)
- (1)- Disposable Leadwire Electrodes (VM-A10057-S)
- (3)- Reusable Lead Wire sets (CMP-W21010)
- (4)- Pathway Vaginal EMG/Stimulation Sensors (PG-6330)
- (2)- Pathway Rectal EMG/Stimulation Sensors (PG-6340)
- (1)- Disposable Electrode (DE-301)
- (1)- Pathway Electrodes (PG-6750)
- (1)- Slippery Stuff 16oz bottle (WO-SG16GP)
- (1)- 25pk Harmony Underpads 17" x 24"
- (1)- Operator's Guide

CTS 2000

CTS Console Systems:
The CTS console system will be the stars of your Pelvic Muscle Rehabilitation program! This inclusive multi-modality system features HIPAA compliant software and reporting capabilities on all modalities used. We offer these systems in three tiers. Start Up, Computerized & Custom Packages. The CTS-2000 combines two channels of sEMG with one channel of Pelvic Muscle Stimulation and one channel of Pressure Manometry. The basic package comes with all the adapters and a start-up supply of consumables for you to begin treatment right out of the box. **Please note that the images seen here are representational images only, as all packages are customized to fit individual needs and budget.**

CMT Order #	PG-CTS2000
Please Call For Pricing	

Starter Accessory Package:

- (1)- CTS 2000 HIPAA Compliant Software
- (1)-Extended Pathway Preamplifier (PG-2583E)
- (4)-Pathway Electrodes Sample Packets (PG-6750)
- (4) Disposable Lead Electrodes (VM-A10057-S)
- (1)-6' Adapter for Disposable Lead Wire Electrodes (PG-7300)
- (4)-Pathway Vaginal EMG/Stimulation Sensors (PG-6330)
- (2)-Pathway Rectal EMG/Stimulation Sensors (PG-6340)
- (4)-Pathway Rectal Silicon Pressure Sensor (PG-6425)
- (1)-USB Serial Interface Cable (PCC-412121)
- (1)-Operator's Guide

CTS 1500

CMT Order #	PG-CTS1500
Please Call For Pricing	

The CTS-1500 console is identical to the CTS-2000 without pressure manometry. This system is a rehab favorite as it includes the most used modalities in Pelvic Muscle Rehabilitation at an affordable price. Contact us for item descriptions. **Please note that the images seen here are representational images only, as all packages are customized to fit individual needs and budget.**

Starter Accessory Package:

- (1) CTS 1500 HIPAA Compliant Software
- (1)-Extended Pathway Preamplifier (PG-2583E)
- (3)-Reusable Lead Wire sets (CMP-W21010)
- (4)-Pathway Electrodes Sample Packets (PG-6750)
- (4)-Disposable Lead Wire Electrodes (VM-A10057-S)
- (1)-6' Adapter for Disposable Lead Wire Electrodes (PG-7300)
- (4) PG-6330 Vaginal Sensors
- (2) PG-6340 Rectal Sensors

CTS POC Cart

Custom designed point of care cart for the Pathway CTS Systems. Cart includes laptop table, printer shelf, instrument shelf & accessory basket. Can also be used with MR-series instrumentation. Specifications: 24 inch base with 75mm casters: 3 free-rolling, 2 locking, Hydraulic lift system, equipment shelf for Pathway unit, laptop shelf (12" x 22"), printer shelf (11.75" x 15.75"), supply basket, minimum height 28", maximum height 37³/₄"

sEMG with Software

Pathway™ MR-20 Dual Channel sEMG: Our most popular sEMG unit, the MR-20 has the ability to measure within a tenth of a micro-volt (Uv) which is crucial for down-training hypertonic muscles. The unit also offers a second channel to monitor accessory muscle enabling the therapist to inhibit overpowering accessory muscle activity. The system works as a stand-alone and can also be utilized for many other applications within the therapy setting. Combined with the Telesis software, it provides a powerful tool for therapists evaluating,

CMT Order #	Description	Price

This unit can be used with Telesis Software.

treating, documenting and storing patient session data throughout the course of treatment. Unit includes two (2) sEMG pre-amplifiers (Item #PG-2583).

Pathway™ MR-25 Dual Channel sEMG: Like the MR-20 system, the MR-25 is a dual channel sEMG designed to provide precise data down to a tenth of a microvolt. The unit offers exceptional patient feedback due to its enhanced LED lit visual display. The MR-25 can also be combined with the Telesis software to provide all the benefits mentioned above. The unit includes two (2) Pathway surface EMG pre-amplifiers (Item #PG-2583).

CMT Order #	Description	Price
PG-9725	Stand Alone Unit	\$1,895.00 ea

This Unit can be used with Telesis Software.

Pathway™ MR-15 Single Channel sEMG: The MR-15 is the single channel version of the MR-25 with an enhanced visual LED display. Like the MR-10 this unit has the ability to measure within a tenth of a microvolt and would be appropriate for the clinician that may have a limited budget who do not wish to sacrifice the accuracy of the microvolt data. This unit can also be combined with the Telesis software. Unit includes one (1) Pathway surface EMG pre-amplifier (Item # PG-2583).

CMT Order #	Description	Price
PG-9715	Stand Alone Unit	\$1,100.00 ea

This Unit can be used with Telesis Software.

Pathway™ MR-10 Single Channel sEMG: The MR-10 is a single channel version of the MR-20. The MR-10 makes no compromise in providing precise microvolt data to a tenth of a microvolt. Can also be combined with the Telesis software. The unit includes 1 Pathway surface EMG pre-amplifier (Item #PG-2583).

CMT Order #	Description	Price
PG-9700	Stand Alone Unit	\$950.00 ea

This Unit can be used with Telesis Software.

EMYO

The EMYO Pediatric biofeedback system is available in either a single or dual channel surface EMG (sEMG) configuration. The system offers Bluetooth communication between the system and the computer which allows for active movement during sessions. EMYO's software package also includes video games for an engaging experience during the biofeedback session.

EMYO is actually a very sophisticated Pediatric Biofeedback System. First of all, it is not just for the pediatric population. EMYO is also intended for anyone needing Pelvic Floor Rehabilitation who would do better in a video game environment. Secondly, EMYO is not just for Pelvic Floor Biofeedback. EMYO does not need to be physically connected to a computer therefore it is an excellent orthopedic system as well. Since you can record active movement, without the hassle of wires, patients have the freedom of movement which is crucial for orthopedic applications.

EMYO100

One channel EMG Biofeedback with games. Includes Starter Accessory Package (PG 2583, PG-3660, PG-7100, 1 pk PG-6750 and 4 packs of PG-7400). One USB Serial Interface cable, one EMYO 100 USB Flash Drive Software Program and Operator's Guide

Software Program

Telesis: Telesis is the software of choice when HIPAA compliance is of utmost importance. The HIPAA compliance portion of the software relates to system access and care provider login capabilities. Once logged in, the system tracks all care provider activities with regard to date, time, patient's sessions & locations which can be easily searched for auditing purposes.

The report generation capabilities of the Telesis software are unparalleled with regard to session documentation. Telesis has the ability to grab raw session data to generate a report narrative along with providing statistical data, graphics and detailed session markers with corresponding microvolt activity. Patient homework reports are detailed with regard to tonic and phasic work/ rest periods with or without home training instrumentation such as the STM-10 or TR-10 home trainers. The software will even print out a "How to" guide to help answer patient questions.

Need to upgrade more than one computer in your facility? Take advantage of our multiple license bundle offer. Save even more off your additional licenses when you purchase more than one.

Minimum Computer Requirements needed to operate Telesis software:

Windows 10 Professional: 64 bit Operating System - Intel i5 Processor or Higher CPU - 4 GB RAM - Available CD ROM - 500 GB Minimum Available Hard Drive Space (to allow for database expansion)

Windows XP Professional, Windows 7.0 Professional, or Windows 8 Professional*: 32 Bit Operating System - 64 Bit Operating System* - Celeron or Higher CPU - RAM: Windows XP Professional - 1GB RAM Windows 7.0 or 8 Professional - 2GB RAM - Available CD ROM - 1 GB Minimum available hard drive space (to allow for database expansion) - USB Port - (*Synergy 3D not supported)

NOTE: The Telesis software license is only valid with one MR-series unit.

CMT Order #	Description	Price
PG-TEL	Full License	\$995.00 per license
PG-TEL-MU	Multiple Unit License	\$295.00 ea

must be ordered at the time of initial purchase

Pathway TR-20 & TR-20c

The TR-20 & TR-20c are moderately priced dual channel sEMG patient trainers that have many features found on our clinical systems. These units allow the patient to monitor pelvic floor muscles and accessory muscle simultaneously, in a home setting. The LED light bars provide sharp visual feedback and feature an 800uV & 30uV scale allowing the patient to work with all surface muscle. Both systems include adjustable goal settings and programmable work/rest protocols. The added advantage of the TR-20c is that it will save its programming from the session while the TR-20 will need to be reprogrammed after each use.

	TR-20	TR-20c
CMT Order #	PG-8620	PG-8625
Price	\$1,050.00 ea	\$1,175.00 ea

Note: These products cannot be used in combination with a software program.

Pathway TR-10 & TR-10c

The TR-10 & TR-10c are both single channel versions of the TR-20 units above. Both units offer the same features and benefits of TR-20 units and are our most popular patient home training units.

	TR-10	TR-10c
CMT Order #	PG-8610	PG-8615
Price	\$625.00 ea	\$750.00 ea

Note: These products cannot be used in combination with a software program.

Electrical Stimulation

Pathway® STM-10: This pelvic floor stimulator is a very sophisticated unit for its size and price. By depressing the up arrow key when turning the instrument on, the clinician is able to program the system by following a series of menu driven prompts that adjust session time, work/rest intervals and frequency. The STM-10 will accept a direct connection to PG-6330 (internal sEMG/NMES vaginal sensor) or the PG-6340 (internal sEMG/NMES rectal sensor).

CMT Order #	PG-STM-10	Price	\$586.34* ea
-------------	---------------------------	-------	--------------

Note: These products cannot be used in combination with a software program.

Liberty®: The Liberty® stimulator is the easiest to use and most cost-effective PFS system available. It is designed to treat stress, urge and mixed incontinence, and can be used with any of the Liberty sensors (sensors sold separately, see pg. 15). Can also be used with Pathway sensors when utilized with the PG-3700 Liberty to Pathway Adapter. The Liberty uses two 3 volt batteries and provides the strongest muscle stimulation.

CMT Order #	UM-Lib	Price	\$586.34* ea
-------------	------------------------	-------	--------------

Exceptional Battery Life!

T.E.N.S.

According to a Gallup Poll, 15% of women in the US suffer from chronic pelvic pain. TENS units are effectively used by Pelvic Floor Therapists to treat conditions such as Interstitial Cystitis, Dysmenorrhea and Prostatitis, to name a few. TENS has also been used to relieve labor pains.

Mechanism	MAXTENS 1000 (Analog)
Channel	Dual

Vermed Electrode Lead Wires - Single use, external pelvic muscle sEMG lead wires to be used with item PG-7100 to interface with the Pathway™ MR and TR handheld series units. (25 placements per bag).

CMT Order #	VM-A10057-S	Price	\$124.95 bag
-------------	-----------------------------	-------	--------------

Disposable lead wire sets (25 placements per bag) used in conjunction with PG-7300 (for CTS units) or PG-7100 for MR & TR series units.

CMT Order #	Description	Price
PG-7400	Disposable Lead Wire Electrodes (25 placements per bag) (1-2 Bags)	\$150.00 ea

Pathway surface electrodes commonly used to monitor accessory muscle in pelvic floor applications. Can be used to monitor all surface muscle. (100 placements per bag)

CMT Order #	PG-6750	Price	\$140.00
-------------	-------------------------	-------	----------

Pre-gelled Electrodes for external pelvic muscle placement or general surface muscle placement when the area of the muscle group is larger than what can be measured with a standard pre-gelled electrode (ie.PG-6750); package of 150. Can be used with Pathway PG-5328, PG-5338, CMT-RLW-71 or CMT-RLW-73.

CMT Order #	DE-301	Price	\$65.00 ea
-------------	------------------------	-------	------------

Adapter that converts Pathway sEMG systems to use internal sensors (PG-6330, PG-6340 & PG-6320) and external lead-wires (PG-5328 or PG-7100 w/ Vermed or (CMT-RLW-71) for pelvic floor placements].

CMT Order #	PG-3660	Price	\$75.00 ea
-------------	-------------------------	-------	------------

Converter that allows non-Pathway systems to utilize internal Pathway™ sensors (PG-6330, PG-6340 & PG-6320) and external lead wires (PG-5328 or PG-7100 w/ Vermed or CMP-W21010) for pelvic floor placements.

CMT Order #	PG-367A	Price	\$45.00 ea
-------------	-------------------------	-------	------------

The Liberty to Pathway Adapter allows the Liberty pelvic floor stimulator to be used in conjunction with Pathway internal and external sensors.

CMT Order #	PG-3700	Price	\$45.00 ea
-------------	-------------------------	-------	------------

Pathway Vaginal sEMG/Stimulation Sensor: Intracavity sensor for all Pathway systems.

CMT Order #	PG-6330	Price	\$48.00 ea
-------------	-------------------------	-------	------------

Pathway Rectal sEMG/Stimulation Sensor: Intracavity sensor for all Pathway systems.
 Note: PG-6340 can be used vaginally for those patients with a smaller internal cavity.

CMT Order #	PG-6340	Price	\$48.00 ea
-------------	-------------------------	-------	------------

Pathway Vaginal/Rectal sEMG only sensor. Vaginal or rectal intracavity sensor for the sEMG Clinical Units, Patient Units, and other sEMGs.

CMT Order #	PG-6320	Price	\$42.00 ea
-------------	-------------------------	-------	------------

Pathway Rectal Silicon Pressure Sensor Rectal intracavity sensor for the Pathway CTS-2000.

CMT Order #	PG-6425	Price	\$65.00 ea
-------------	-------------------------	-------	------------

The Liberty Vaginal Sensor is designed to work with the Liberty Pelvic Floor Stimulator. It features circumferential contacts and a direct connection to the Liberty stimulator without an adapter.

CMT Order #	UM-VS	Price	\$78.00 ea
-------------	-----------------------	-------	------------

The Liberty Rectal Sensor is designed to work with the Liberty Pelvic Floor Stimulator. As with the vaginal sensor and extended handle sensor, it features circumferential contacts and a direct connection to the Liberty stimulator without an adapter.

CMT Order #	UM-RS	Price	\$75.00 ea
-------------	-----------------------	-------	------------

The Liberty Extended Handle Vaginal Sensor provides patients with the leverage and stability they need to assure an accurate placement.

CMT Order #	UM-EHVC	Price	\$75.00 ea
-------------	-------------------------	-------	------------

The IVS-2 is the smallest, most comfortable female EMG sensor available and features gold detection electrodes. The IVS-2 is inserted similarly to a tampon and positions above the urogenital diaphragm. Its small size and unique placement allows it to measure muscle activity even when the patient is moving. This is an important benefit since certain movements are closely associated with urine loss. **Note: Requires the universal adapter pictured below.**

CMT Order #	PMC-4525	Price	\$34.95 ea
-------------	--------------------------	-------	------------

Universal Snap Adaptor
 (works with most surface EMG cables)

CMT Order #	PMC-4693	Price	\$15.00 ea
-------------	--------------------------	-------	------------

The MEP monitors the EMG activity of the levator ani muscle, including simultaneous measurements of the proximal and distal bundles of the external anal sphincter (EAS). The deep measurement of the EAS make the MEP uniquely suited for post-prostatectomy pelvic muscle rehab, since it allows training to be specifically directed to improving tonic support of the bladder neck. **Note: Requires the MEP adapter pictured below.**

CMT Order #	PMC-4520	Price	\$29.95 ea
-------------	--------------------------	-------	------------

The MEP Adapter is specially designed to accommodate the MEP Dual sEMG internal sensor. The adapter channels the two sEMG signals to the appropriate channels of your sEMG instrument. Works with all manufacturers instrumentation.

CMT Order #	PMC-4695G	Price	\$14.95 ea
-------------	---------------------------	-------	------------

The Keyspan USA-19HS USB Serial Adapter

Tested and approved for Pathway users who have a 9 pin serial port sEMG system and a computer with a USB port. The Keyspan USB to Serial adapter is the only adapter that provides a reliable connection from your Pathway device to your computer.

CMT Order #	PCC-USA-19HS	Price	\$50.00 ea
-------------	------------------------------	-------	------------

Computer Grounding Cable (Noise Reduction)

Some laptop computers produce high levels of electrical noise due to insufficient grounding. This Computer Noise Reduction Cable provides optimal performance of your surface EMG system. Note: This cable does not provide A/C power to your computer. This cable only adds a ground wire to your computer.

CMT Order #	PG-NRC	Price	\$50.00 ea
-------------	------------------------	-------	------------

9-pin Serial Cable

6' 9-pin serial extension cable, male/female. Beige

CMT Order #	PCC-421260	Price	\$19.99 ea
-------------	----------------------------	-------	------------

USB Cable

High-Speed USB 2.0 Cable, A to B 6ft.

CMT Order #	PCC-412121	Price	\$9.95 ea
-------------	----------------------------	-------	-----------

Name Brand Computer: There are frequent changes to computer model numbers making it difficult to include a model number as part of our catalog. Therefore, we will guarantee that all the computers that we sell will either meet or exceed the specifications listed below. These specification exceed the manufacturers' minimum requirements for all instrumentation that we provide.

- Intel Core i3-8130U Processor (Dual Core, 4M Cache, 2.2GHz,15W)
- Windows 10 Pro 64bit English, French, Spanish
- 4GB, 1x4GB, DDR4 2400MHz Non-ECC
- 2.5" 500GB 7200RPM SATA Hard Drive
- 15.6" HD 1366x768 Anti-Glare, Non-Touch, Camera & Microphone, WLAN Capable

-------------	----------------------------------	-------	-------------

New

V-Tone Vaginal Weights: V-Tone vaginal weights is a set of weights that are inserted into the vagina to help strengthen the pelvic floor muscles. These muscles extend from the pubic bone to the tail bone and support the bladder and uterus. The set includes two cones (one small and one large to be individually used based on anatomical introitus size) that are used to house the weight and make for a comfortable weightlifting experience. The set includes two 20gm weights, one 10gm weight and one 5gm weight. This allows the user to start with 5 grams and progress, in 5gm increments to as much as 55 grams.

CMT Order #	CMT-MC200	Price	\$34.95 ea

The Ab Wrap System

The Ab System is designed by a team of pelvic floor physiotherapists and postpartum pelvic floor fitness specialists. The Ab System abdominal binder has everything you need to Prepare, Recover and Restore so you CAN have core confidence for parenthood! Belly wrapping plays a role in healing diastasis recti by encouraging re-alignment of the rectus muscles, supporting the pelvic and uterus to normal size and improving circulation. Measurements should be taken during pregnancy and ideally around 30 weeks. The Ab Wrap is made with wooly stretch nylon, a padded lumbar support and has gripper elastic on the lumbar pad that is made with 27% polyester and 73% rubber (contains latex). Included in the Ab System are two ab tanks, 1 ab wrap and one delicates laundry bag.

After birth the wrap was designed to be worn immediately postpartum up to around 8 weeks, or until you have restored the ability to generate tension in your abdominal wall. A pelvic floor physiotherapist is an essential part of your recovery and will help determine this.

- Use the Core Confidence program to restore your core.
- You must wrap from the bottom up. Wrapping from top down will increase pressure on the uterus and pelvic organs causing a downward descent (prolapse)
- You are aiming for a light compression (gentle hug) and allow for involution of the uterus. Too much compression will increase IAP (intra abdominal pressure) and compromise the pelvic floor
- Belly wrapping alone is not enough – you must do the appropriate exercises to restore the core from the inside out.

Belly Wrapping Plays A Role In 1. Healing diastasis recti and encouraging re-alignment of the rectus muscles (the 6 pack) 2. Keeping the birthing parent warm (mother roasting) 3. Encouraging rest 4. Supporting the pelvis and the tissues in the abdominal wall 5. Guiding the postpartum person into restorative posture and alignment. 6. Supporting the uterus in its return to its normal size (involution). 7. Improving circulation. 8. Providing comfort and support – especially after cesarean births.

How do I wash my Ab Tank and Ab Wrap? When it is time to wash one of your Ab Tanks place it in your delicates bag all by itself (meaning without the wrap) and machine wash in cold water and then hang to dry. To wash your Ab Wrap we recommend hand washing it then hanging to dry to preserve the Velcro and the elastic. Because you wear it over your Ab Tank you will not need to wash the Ab Wrap as much.

NOTE: Please do not purchase this product if your goal is to 'flatten your abs'. This garment is not a waist trainer but rather a pelvic and lower abdominal support wrap for postpartum recovery or temporary support in rehab movement under the guidance of a physiotherapist.

Mini Cradle® Support: A premium maternity belt to complement every pregnant mom's maternity wear collection. Designed to be worn with maternity fashions, this pregnancy support belly band discretely fits under most maternity clothes. The Mini Cradle maternity support reduces the pain during pregnancy and can be worn throughout all trimesters of pregnancy. Available in Petite, Small, Medium and Large. **Size is based on current pregnancy weight.**

CMT Order #	Description	Pant Size	Current Weight	Price
IYB-MCP	Petite	0-5	90-135 lbs.	\$24.95 ea
IYB-MCS	Small	6-12	136-180 lbs.	
IYB-MCM	Medium	13-18	181-225 lbs.	
IYB-MCL	Large	20-28	226-270 lbs.	

Best Cradle® Support: The Best Cradle® offers fully adjustable orthopedic support for abdominal and back straining. Also eases pain from hip separation and pubic symphysis. Much like a woman clasping her hands under her abdomen, the Best Cradle® supports the weight of pregnancy, yet does not restrict mother or child. By freeing the arms and promoting proper circulation to the lower extremities, the undergarment also allows for many mothers to remain active through the third trimester. **Size chart: Use pant size before pregnancy:** Size 3-10; Small, Size 8-16; Medium and Size 14-20; Large.

CMT Order #	Description	Pant Size	Current Weight	Price

Hide-A-Way Prolapse Strap: Support garment for your prolapse bladder that can be adjusted to accommodate any body type. The Hide-A-Way's sleek design makes it virtually impossible to see under clothing and comfortable to wear for extended periods of time.

CMT Order #	Price
PHA-CA59759	\$44.95 ea

V2 Supporter: Compression therapy for vulvar varicosities or the feeling that "everything is going to fall out the bottom." During pregnancy, vulvar varicosities can occur for many reasons. Increased weight of the enlarged uterus sometimes creates pressure on veins in the pelvic area and interferes with the flow of blood returning from the legs. Naturally higher levels of estrogen promote growth, while increased progesterone tends to relax the smooth muscles of the vein walls. The relaxed veins can become distended and "pop out" as vulvar varicosities.

Wearing the V2 supporter before rising in the morning helps prevent excessive swelling of the vulvar veins. The V2 Supporter provides clinically proven compression therapy. **Size is based on current pregnancy weight.**

Amielle Restore Dilator Set:

The Amielle Restore Vaginal Dilators are intended to gently exercise vaginal muscles to help improve elasticity and may assist in building muscle tolerance. Five graduated sizes of exercisers allow you to progressively increase tolerance at your own pace.

In addition to the cones, your Amielle Restore Vaginal Dilator Exercise system comes with a Universal Twist & Lock handle, as well as easy-to-read instruction guide, and a discreet carrying bag.

Cleaning: Universal handle should be washed after each use. Wash in hot, soapy water, rinse thoroughly and dry before storing in carrying bag. Ensure all traces of soap are removed to avoid irritation. Alternatively, you may immerse the exerciser cones in boiling water.

CMT Order #	Description	Price

Intimate Rose Silicone Dilator Set: Intimate Rose vaginal dilators use a smooth, body safe, medical grade silicone that's BPA free and designed to glide into the vaginal opening for more comfortable use. Unlike any other vaginal dilators on the market, they are not sticky or hard. Designed by a pelvic health expert, the graduated sizes in the vaginal dilator sets allow you to find the perfect fit and to progress towards your goals. They are recommended for vaginitis treatment, vulvodynia, vaginismus, therapy after radiation and generalized vaginal pain that is not caused by infection.

She-ology Dilator Sets:

Revitalize and strengthen vaginal muscles with the contoured She-Ology 5-Piece Vaginal Dilator Set. The uniquely designed 5-piece dilator kits are ergonomically curved and gradually sized to allow for gentle dilation. The premium silicone probes have a curved base for gentle insertion and stimulation. The graduated set has been created to rejuvenate vaginal muscles and reduce insertion discomfort with every use. Use the small dilator to begin and as you exercise and increase the elasticity of muscles, advance to the larger probes. The hypoallergenic premium silicone is body safe, unscented and phthalate free.

Bowel Rehabilitation & Aids

Release : Genetics, pregnancy, delivery, heavy lifting, poor breathing and/or chronic straining can lead to structural and anatomical changes in a woman's pelvic structures; such as Rectocele or pelvic floor drop. These changes can lead to weakened and compromised support for the pelvic organs (vagina, uterus, rectum and/or bladder). These conditions are often referred to as pelvic organ prolapse or pelvic relaxation. The benefits of using the Release is to support the pelvic tissues so that the bowels can fully evacuate without straining, and to protect vulnerable tissues from further stress. Release enhances your quality of life by providing ease of bowel movement with less discomfort and better efficiency.

- ▶ The Release helps to create a more anatomical positioning so the bowels can be emptied with ease.
- ▶ Silicone wrapped for soft, comfortable ease of use
- ▶ Elongated handle to accommodate all body types including pregnancy
- ▶ Single Patient / Multi-use tool
- ▶ Cleans with mild, anti-bacterial soap and warm water.
- ▶ Use with water-based lubricant only

Pany Nazari, PT, DPT, BCB-PMD
Clinical Design Consultant

MUI Scientific Balloon Catheter: Physical therapists and other practitioners specializing in lower bowel dysfunction now have a specialty balloon catheter designed for the treatment of fecal incontinence and related disorders. These single-use balloon catheters are custom designed with a latex free, polyisoprene balloon for easy and effective pressure biofeedback therapy and retraining. (Note: Syringe is sold separately.) Can be purchased individually or in a case of 10 catheters. **SINGLE USE.**

Features:

- Non latex 400ml volume balloon
- Can be used in conjunction with solid-state or water-perfused motility systems
- 60cm / 23 5/8" tubing
- Used for Balloon Expulsion test and biofeedback
- Specially designed tubing for easy intubation
- Markings for balloon placement
- Fitted with polyisoprene balloon
- DEHP-free

- ▶ Treated with a proven vinyl protective coating that is engineered to create a tough, effective barrier against the three biggest problems encountered in today's enviroment: germs, abrasion and stains.
- ▶ Offers superior bacterial protection that the healthcare industry can count on.
- ▶ Guards against surface growth of fungus mold and mildew spores.
- ▶ Keeps its good looks and is highly resistant to microbial deterioration that can cause cracking, splitting, and loss of flexibility.

PATIENT TRAINERS

Pathway® STM-10: A very sophisticated unit for its size and price. By depressing the up arrow key when turning the instrument on, the clinician is able to program the system by following a series of menu driven prompts that adjust session time, Work/Rest intervals and frequency. The STM-10 will accept a direct connection to the PG-6330 (internal sEMG/NMES vaginal sensor) or the PG-6340 (internal sEMG/NMES rectal sensor). The STM-10 is Medicare approved for up to 80% coverage for qualifying patients.

CMT Order #	Price
PG-STM10	\$475.00 ea

Liberty® Pelvic Floor Stimulator: The easiest to use and most cost-effective PFS system available. It is designed to treat stress, urge and mixed incontinence, and consists of a stimulation device and can be used with any of the Liberty sensors (sensors sold separately, see pg. 15). It can also be used with the Pathway sensors when used with the PG-3700 Adapter. The Liberty is Medicare approved for up to 80% coverage for qualifying patients.

CMT Order #	Price
UM-LIB	\$375.00 ea

Pathway® TR-10 & TR-10c: Our most popular patient trainer, the TR-10 is a single channel programmable sEMG patient trainer. The system features a 1-800 microvolt scale for general orthopedic rehab applications and with a few adjustments, the scale can be changed to 1-30 micro-volts, for more reactivity, which is usually needed for pelvic floor patients. The system allows for above and below goal setting for both strength and relaxation training and even features two work/rest settings of 5/10 and 10/10. The TR-10c is most commonly recommended as a patient trainer for those patients who prefer not to re-program the instrument each time they use it or for patients where the therapist feels compliance may be an issue.

CMT's Home Rental DME Program

With a full time DME staff dedicated to coordinating information between Patients, Physicians, Physical Therapists and insurance companies, CMT is the best choice to provide your patients with the instrumentation needed for their pelvic muscle rehabilitation home treatment program. As of 2012, we became Medicare accredited and can now streamline our paperwork while keeping our entire patient billing in-house. We are the only company in this sector that offers these services!

What we provide:

1. Full-time staff available to answer your questions Monday – Friday.
2. Pre-certification of your patients' insurance benefits within 3-5 days. (Provided we are able to contact the insurance company.)
3. Guarantee that the products we offer are in stock and ready to ship (except for manufacturer's backorders.)
4. Direct billing to insurance or patient with no Clinician involvement.

Rx Pad Program

The program tracks the total dollar volume of products purchased by you, your facility, and your patients and rewards everyone with discounts based on the total volume amount. Not only does the facility get the discount, but it can be passed along to your patients. It's a win-win for everyone!

The dollar volume is comprised of:

1. Facility Purchases
2. Patient purchases (either by phone or online)
3. DME (Home Rental) Purchases and Rentals*
4. Instrumentation Repairs

Remember, your Facility ID# is the gateway for determining your overall discount level. Each January we will assess your total sales volume and corresponding discount level. Should you increase your total sales and surpass your current discount level then you will jump to the next level. The greater your volume of business, the higher the discount level you and your patients will get to enjoy. Enroll today!

What is the Process to Enroll?

**Per our Medicare Accreditation we cannot extend RX Discount to DME units.*

Call (800) 382-5879 or enter the Website ID # into the search engine at cmtmedical.com for easy ordering.

Affiliate Program

Who is this program for...

Our Affiliate Program is designed for smaller facilities or single clinicians who would like the benefit of a world-class distribution channel; without the expense or space. CMT, a business leader specializing in pelvic muscle rehabilitation products and services, will fill your patients order so there is no guess work from you! You need only to direct your patients to your existing website or blog. Don't have either one; then just provide them with your unique Affiliate URL, which we will provide, and we will take care of the rest!

What are the benefits....

In addition to being the fulfillment agent for the products you typically refer to your patients, CMT will also provide you with a 10% referral fee based on products sold through your unique Affiliate landing page. Not only are we taking care of your patients' orders, but we are also generating an extra revenue stream for you. It's a win for you and a win for your patients!

How Do I Get Started?

To register is quick and easy! Simply fill go to www.cmtmedical.com; and click on the CMT Programs on our home page to find the Affiliate Registration link.

Once there, just fill out the form with the needed information. During this process you will need to create an account and password and then choose from a list of products you normally advocate for your patients.

Some of them include:

1. sEMG/PFS Sensors
2. Dilators
3. Pelvic Floor Massage tools
4. Vaginal Weights
5. SI Belts
6. Lubricants
7. Maternity and Postpartum Supports

If you don't see a product listed, no problem! Just add it in the space provided and we will include it. Once you've completed the initial registration, you will be asked to read through and sign our standard Terms and Conditions Agreement. Once this done, we will get to work on your unique Affiliate Landing Page customizing it based on the products you've chosen to be available to your patients for purchase. Your landing page can also be customized to include your logo and a company introduction or a blurb about yourself or your facility.

Once approved, you will receive a Congratulations email that will instruct you to the Affiliate Area to get your unique Affiliate URL. Remember, this URL can be embedded into your existing "Shop Here" tab on your website or blog or given directly to your patient. It's that simple!

Prices subject to change without notice. Please visit cmtmedical.com to check for up-to-date pricing.
